## NATURE'S CLEANEST ENERGY

## INTRODUCTION

Brothers Gas Bottling & Distribution Co. LLC was established in 1992 has experienced a meteoric rise; from humble beginning providing clean & portable fuel solutions from a single LPG Bottling Facility in UAE to our current position as leading LPG & Industrial Gas solution providers spread across different countries across the globe.

Unrivalled & Unique Blend - Brothers Gas is the ONLY Company which offers one - stop solution for all type of Gases, Chemicals and Engineering solutions with an integrated business model.

The company's broad portfolio is catered in form of Bulk Liquids, Cylinders, ISO Tanks, etc.

Brothers Gas is strategically located in different parts of the world to serve its broad base of customers.

Today Brothers Gas serves millions of customers annually with a very large infrastructure comprising of huge storage capacity in LPG & Cryogenics, Filling Plants, and Distribution fleet of 100+ trucks for bulk and packages gases.

## VISION STATEMENT

“TO BECOME THE MOST RELIABLE MARKET LEADER  
IN TOTAL GAS SOLUTIONS”

# LIQUEFIED PETROLEUM GAS

# LIQUEFIED PETROLEUM GAS

LPG is by far the most versatile, portable, clean, accessible and efficient energy source which is readily available to consumers around the world and used in thousands of applications.

Some of the sectors served by LPG are as follows:

- Hospitality
- Transportation
- Power generation
- Heating
- Industries
- Farming
- Cooking
- Recreational purposes

LPG is a gas easily stored in liquid form in small, medium or large containers.

We at Brothers Gas provide versatile fuel backed by optimized solutions to meet the needs of our customers from last 20+ years.

**Enhanced LPG Solutions:** From a single product LPG, Brothers Gas started diversifying in Enhanced LPG Solutions for specialized applications.

Brothers Gas has invested in state of the art Aerosol Plant to produce Odorless Gas and caters to various industries like Perfume, Cosmetic, etc.

In 2010 Brothers Gas started its 1st LPG additive filling facility to provide alternative and enhanced products for applications like Metal Cutting, Brazing, Heating and Auto LPG solutions like Forklift Gas.

**DIVERSE SUPPLY MODES IN LPG ARE...**

## LPG BOTTLING

LPG Bottling plants spread over different locations and built with a state - of - the - art technology are equipped to fill 25lbs, 50lbs and 100lbs cylinders functioning at highest safety levels meeting international standards and adhering to the local regulators requirements.

These LPG bottling facilities caters to the requirements of Brothers Gas cylinder distributors within UAE and other export markets.

In 2008 the LPG Plant opened in Ras Al Khaimah with a storage capacity of million litres.

The plant is equipped with Cylinder filling facility.

## LIQUEFIED PETROLEUM GAS

### LPG CYLINDER SUPPLIES

We bring this versatile and readily available fuel in portable solutions for our wide range of customers in Commercial, Industrial and Domestic Sector and allow people to use our gas as required.

Supplied in an extensive range of cylinders to suit the requirements and delivered at your door step backed by an ultra-modern fleet of distribution vehicles.

Backed by tailor made engineering solutions of manifold systems with a range of accessories like regulators, valves, etc... we also provide our varied customer base with options of Liquid Off Take Valve ( LOT), Large Cylinders and other solutions.

### LPG BULK SUPPLIES

Supply in bulk LP Gas has inherent advantages to users giving them the flexibility and control for using it for multiple applications in large volumes and eliminating the risk of running out of gas.

Brothers Gas is supplying LP Gas in bulk to the best names in the Hospitality, Industries, Domestic, Educational institutions and medical facilities across the geographical landscape of UAE.

Our substantial gas storage and supply chain infrastructure delivers supply-security that is unmatched in the industry, this offers assurance and reliability to all our customers. Brothers Gas owns one of the largest LPG Storage facilities which has a capacity running into millions of litres.

### WHY CHOOSE BROTHERS GAS FOR LPG ?

- Reliable delivery - Having invested in one of the largest distribution fleet (100+), we are able to deliver to all locations in the UAE.
- Experience and expertise - With over 25 years of gas storage and supply experience. Our expertise and range of supply and storage options is unrivalled in the industry. We are trustworthy for all gas-supply requirement.
- Remote tank monitoring - Our sophisticated telemetry system allows us to remotely monitor the contents of the tank and schedule top-ups to ensure there is never any shortage.
- Engineering team - Our highly experienced in-house customer engineering team offers unrivalled technical design capabilities, free consultancy and full project management of your LPG supply installation. We stock and supply a wide range of tank sizes allowing us the flexibility to specify single or multiple tank combinations to suit almost any application and site - assuming there is sufficient space for fuel storage in the first place.

# INDUSTRIAL GASES & CHEMICALS

# INDUSTRIAL GASES & CHEMICALS

## INDUSTRIAL GASES

The air we breathe is a mixture of various gases, each with its own unique properties that are invaluable for industrial process and medical usage.

The principal gases are nitrogen, oxygen, carbon dioxide, argon, hydrogen, helium and acetylene; although a huge variety of gases and mixtures are available.

Some of the sectors served by Industrial Gases are as follows:

- Chemicals
- Glass
- Welding and Metal Fabrication
- Ship Repair and Maintenance
- Food and Beverages
- Medical
- Oil and Gas
- Electronics
- Hospitality
- Paper
- Construction and Infrastructure
- Laborites
- Metal

A wide range of gases can be transported to users in a number of different ways, for example in cylinders under very high pressure or in special vessels designed to hold cryogenically liquefied gases at extremely low temperatures.

The volume of gases purity levels and delivery intervals will vary depending on their utilization.

We at Brothers Gas have been providing Industrial Gas solutions from 2010 which started with only distribution of cylinders. With continuous growth at the end of 2014 a state of the art Industrial Gas Plant equipped to provide Industrial, Medical, Specialty, Calibration and Ultra High Purity Gases was added to the portfolio of Brothers Gas.

Diversification led to the opening of one of the only few Ammonia Filling Plants in the region by the end of 2015.

## DIVERSE SUPPLY MODES IN INDUSTRIAL GAS ARE:

### INDUSTRIAL GAS CYLINDER & RACK SUPPLIES

Brothers Gas offers cylinders, the traditional solution for low volume of gas. For small and medium sized users, single cylinders offer a low-cost, versatile method of gas supply. Cylinders can be supplied in a full range of sizes, pressures and gas purities for a wide range of gases and gas mixtures or for larger volumes manifolded cylinder packs can be supplied.

From oxygen, nitrogen, argon, helium, and hydrogen to medical and specialty gases, calibration gas mixtures and high-purity gases to welding, cutting gases, shielding and fuel gases. You can also rely on us for packaged chemicals and a wide range of refrigerant gases.

### BULK GASES

From supplies in Dewars, Micro Bulk Solutions to Bulk Deliveries by truck we provide a safe and reliable supply option as per the needs of our customer.

Bulk deliveries by tankers provide a safe, reliable supply option for high volumes users, Brothers Gas team can assist from determining the right size & type of storage tanks based on volume, desired pressure, purity and flow rate.

Backed by a flexible and efficient logistics and distribution infrastructure Brothers Gas will ensure its customers always get the products they need - quickly, reliably and cost-efficiently

### WHY CHOOSE BROTHERS GAS FOR INDUSTRIAL GAS SUPPLY?

- We offer safety and application training on gas characteristics and hazards, safe handling and storage, personnel protective equipment and the correct use of your gases for each application.
- With the user of telemetry systems, our logistics teams can continuously monitor the level of product in your tanks to help determine the optimum date and time for your next delivery.

# VERSATILE RANGE

## WELDING & CUTTING EQUIPMENT

The Welding and Cutting Division of Brothers Gas provides a wide range with high end quality and services for Welding and Cutting Equipment, MMA, TIG and MIG Welding Machines, Accessories, Personnel Protective Equipment, Plasma Cutting Machines, After Sales and Technical Support.

## FORKLIFT GAS

Forklift Gas (FLG) is a new solution empowering your company's forklift trucks to save time, money and the environment.

## METAL CUTTING GAS

MCG is a fuel gas that out produces acetylene for cutting and brazing at a fraction of the cost.

## CHEMICALS

Brothers Gas supplies a host of world class additives and packaged specialty chemicals gases across a range of industries for a wide range of applications.

## SPECIALTY GASES

With dedicated production facilities, accredited analytical laboratories, as well as purpose-designed and custom-engineered total supply systems. Brothers Gas is capable of supplying specialty and mixture gases and precision blends available in disposable or refillable cylinders.

## REFRIGERANT GASES

We offer the widest range of products on the market, including HCFCs, HFCs, HFOs and natural refrigerants, a full range of package sizes including cylinders, drums, and bulk deliveries.

## FUEL GASES

Most fuel gases are composed in whole or in part of hydrocarbons we can supply Propane, Butane, Propylene and Acetylene in cylinder, toners or bulk form.

## AEROSOL PROPELLANT

LPG based Aerosol propellants are safe and environment friendly, apart from being economically viable and is a proven alternative for Chlorofluorocarbons (CFCs)

# ENGINEERING SERVICES

Brothers Gas has complete engineering solutions for LPG, Industrial, Medical Gas, Offshore and Marine Services to provide full turnkey project from design till commissioning.

## NEW INSTALLATIONS

The qualified and trained personnel at Brothers Gas are at your service to provide you the most professional gas installations in multiple sectors like Malls, Hotels, Industries, Domestic, etc. for LPG and Cryogenics. A dedicated team of engineers, supervisors and technicians are at your service to help you install the best possible system as per your needs.

## MAINTENANCE

It is always advisable to manage systems under authorized and trained personnel. We not only build gas systems but also provide services for maintenance of gas systems. Dedicated teams of engineers and technicians are available to do preventive, as well as routine maintenance of these systems. Our teams are available 24/7 to address emergencies.

## CONSULTANCY & ENGINEERING SERVICES

Whether you require a Project Engineer for a day or you need a complete plant designed and built from a 'green field' site, Brothers Gas is the ideal industry partner for you, with extensive experience and expertise in the LPG and Industrial Gases industry.

# INTERNATIONAL TRADE

## INTERNATIONAL TRADE

With its strategically located offices & depots across the globe, Brothers Gas exports a wide range of gases and quality products to a number of countries.

A fleet of more than 200+ ISO Tanks owned by Brothers Gas makes it the largest player in the region, it is used for transportation of different gases to cater the supply and demand in various markets globally.

Alternatively the products can also be supplied in Cylinder, Toners or various other forms as per needs of the customers.

Tailor made solutions in supply chains ensures reliability and continuous gas supply.

List of Products we offer:

• LPG	• Propane
• Butane	• Aerosol
• R290	• R600a
• Ammonia	• Refrigerant Gases
• Industrial & Medical Gases	• UHP Grade Gases
• Specialty Gases
